

Taj Mahal Photography

The website's technical side is done. Schema, AI crawler permissions, AEO, GEO and structured data are all at 2026 best-practice. **Rankings will move when we build off-site authority — and that is your part.**

Six priorities in order below. Do them in order: earlier ones unlock the later ones.

1

Claim the Google Business Profile

THIS WEEK

WHY THIS MATTERS

Searching "Taj Mahal photographer" shows a Map Pack — three local listings above all regular results. Without a verified GBP we are invisible to the largest source of local-intent traffic.

HOW TO DO IT

- Go to **business.google.com** and claim the listing for our Taj Mahal East Gate Road address.
- Verify it — Google posts a PIN to the address.
- Upload 30+ photos: portfolio shots, with-client shots, and the government license certificate.
- Post weekly updates — each new shoot, new package, seasonal news.
- Reply to every review within 48 hours.
- Mirror our website FAQ in the GBP Q&A section.

What it does: Historically moves local businesses from invisible to top-3 Map Pack within 60–90 days. The single biggest action on this entire list.

WHY THIS MATTERS

Google AI Overviews and the Reviews carousel pull review quotes directly from Google, TripAdvisor and Reddit. We have zero verifiable reviews today, so the website's star rating schema is *intentionally switched off* — turning it on without real reviews would violate Google policy and demote the site.

HOW TO DO IT

- Claim the TripAdvisor business listing.
- Create a WhatsApp template plus QR code we hand every client after photo delivery, asking for a review.
- Target: **30 Google reviews + 15 TripAdvisor reviews in 90 days.**
- Once reviews exist, send the public URLs to the dev team — they will wire them into the website schema and switch the star rating back on.

***What it does:** Unlocks star ratings in our search listings, AI engines start citing us by name, and conversion lifts noticeably.*

WHY THIS MATTERS

These platforms own "things to do in Agra" and "Taj Mahal tour" queries. Each listing drives direct bookings *and* earns us a backlink.

HOW TO DO IT

List all four flagship offerings — the two Sunrise Luxury Tours (\$650 / \$899) and the two Guide + Photo combos (\$50 / \$80) — on:

- GetYourGuide
- Viator
- Klook (massive Asia / Southeast Asia traffic)
- Airbnb Experiences

4

Reddit & YouTube presence

ONGOING

WHY THIS MATTERS

Reddit drives **24–47% of Perplexity citations**. YouTube is the **second most-cited domain** in Google AI Overviews after Reddit. These are where AI engines learn we exist.

HOW TO DO IT

- **Reddit:** answer 5 questions a week in r/IndiaTravel, r/travel and r/solotravel about Taj Mahal permits, photography, sunrise timing, same-day Delhi tours. Be the helpful expert. Link our site only when genuinely useful — never spam.
- **YouTube:** post one 60-second clip per package with proper title, description and tags. Even short clips get indexed and cited.

What it does: Compounding citation share in AI search and organic Google over 3–6 months.

5

Press & travel-blog backlinks

ONGOING

WHY THIS MATTERS

High-authority backlinks from established sites are still the #1 traditional ranking factor for Google. Schema is a tiebreaker — backlinks are the actual lever.

HOW TO DO IT

- Approach the top 20 India travel bloggers. Offer a free shoot in exchange for a do-follow backlink plus an authentic review.
- Pitch the travel desks at Times of India, Hindustan Times, The Tribune and NDTV with two story angles:
 - "Meet the government-licensed photographer at the Taj Mahal."
 - "How a same-day Delhi-to-Agra sunrise luxury tour actually works."

6

Show our credentials on the website

QUICK WIN

WHY THIS MATTERS

The license is referenced in our website schema but not visible to humans. AI engines verify credentials by cross-checking on-page artifacts.

HOW TO DO IT

Send the dev team:

- The actual government license number (currently shown as a "GOVT ID" placeholder).
- A high-resolution photograph of the license certificate.

What it does: Dev will display them on the About page within one day.

REALISTIC LEAD FORECAST

Without off-site work: **+3 to 5 inquiries / month** from AI visibility alone.

With the six tasks above:

- **Q1 (months 1–3):** +5 to 10 inquiries / month — GBP claim, first reviews.
- **Q2 (months 4–6):** +20 to 40 / month — reviews compound, first AI citations land.
- **Q3 (months 7–9):** +50 to 80 / month — AI engines re-rank with off-site signals.
- **Year-end:** organic + AI driving 50%+ of inbound vs. mostly word-of-mouth today.

The single number-swing factor is Priority 1 — the Google Business Profile.

✓ WHAT THE DEV TEAM ALREADY SHIPPED (context only — no action needed)

- ✓ 29 indexed pages with clean structured data
- ✓ /llms.txt published for AI agents
- ✓ 30+ AI bots explicitly allowed (ChatGPT, Claude, Perplexity, Gemini, Bing, Meta)
- ✓ Wikidata entity links for Taj Mahal, Agra Fort, Agra, Delhi, Ministry of Tourism
- ✓ Quick Answer + FAQ + step-by-step itinerary on every package page
- ✓ Speakable schema for voice and AI extraction
- ✓ Quick Capture \$50 · Sunrise \$99 · Pre-Wedding \$199 · Family \$299 · Heritage Trail \$399 · Full Day \$499
- ✓ Guide + Photo Combos: \$50 small group · \$80 large group
- ✓ Delhi Luxury Tours: \$650 Innova · \$899 Urbania

Questions on any of the six items: message **Bilal / dev team**.
